CENTER FOR NETWORK CARE

Consent Form

I hereby request and consent to receiving spinal care, including wellness education in this office by a chiropractor who provides *Network Spinal Analysis (Network Care, NSA)*, a low force approach which has unique outcomes and clinical results. This practitioner chooses to practice NSA, as he is professionally and personally confident in regard to the safety and effectiveness of this form of care.

This office provides care in accordance with the *Council on Chiropractic Guidelines* and the *Canon of Ethics of the Association for Network Care*, and my doctor has been trained in traditional chiropractic care and trained extensively and certified in the procedures of *Network Spinal Analysis*.

The purpose of this consent form is to help me better understand the nature of the services offered in this office and our mutual responsibilities. This fosters a more effective relationship and avoids misunderstandings regarding expectations. Having well understood expectations is anticipated to promote a greater sense of safety and healing.

NSA does not attempt to manually, or by instrument, manipulate spinal fixations structurally (often associated with a snapping or popping sound), nor does it directly treat painful areas of the spine and body. *Instead, by enhancing my body's awareness of itself and, specifically my spine, I understand I can develop new strategies for healing, adapting to stress, and experiencing wellness. These strategies promote spontaneous self-correction and self-regulation of spinal tension patterns and healing.*

NSA consists of gentle touch contacts along the neck and back to achieve greater communication between the brain and body, and new sensory and motor strategies. NSA adopts an approach associated with somatic (body/spinal) training. There is a body of research characterizing NSA care and documenting its unique and significant wellness benefits. I understand I may obtain copies of published research articles and/or abstracts through this office.

I am aware that I will be receiving gentle touch Network adjustments, also called *entrainments*. Assessments of my progress will include monitoring of my spine and body awareness, responsiveness to inner rhythms, tension, and ease patterns. These will occur in accordance with levels of care. These will include my personal perception of my wellness and my awareness of my spine and body-mind changes. My chiropractor will report to me the improvement in my spinal and nervous system integrity and my ability to self-regulate tension and to reorganize my spine.

NSA is advanced through a series of Levels of Care. Each Level of Care involves the development of new and unique spontaneous spinal wave motions, other body movements, and oscillations. These waves, which are suggested to be associated with greater spinal stability, the redistribution of energy, and increased transfer of internal information are also associated with greater wellness, improved quality of life, and increased life enjoyment.

I also understand that, in addition to NSA care and wellness education, my practitioner may perform additional exams or assessments and offer health/spinal care or advice that is consistent with my individual needs.

Please Read and Sign the Following:

It has been explained to my satisfaction, and I understand that the care offered at this office is not a form of, or replacement for, the diagnosis or treatment of any symptom, disease, or malady. Instead, it is a form of wellness care and self-education that empowers my connection with my body-mind and develops new strategies for spinal and nervous system integrity and wellness. It develops new capacities in my body for the identification of, spontaneous release of, and redirection of tension, including those that are unique to NSA.

It is common for people receiving Network Care to breathe more deeply and fully, engaging the spine with their respiration, to spontaneously adapt postures that release or redistribute tension, to 'bust' stress, and to experience more of their inner energy. I understand it is common to experience a wider range of motion and emotion during care. It is common, as care progresses, to find new options in the body and in life, which often lead to significant life changes.

This form of care is NOT suggested for those individuals who wish to remove a symptom or condition without the occurrence of other fundamental changes in their lives. The care in this office often promotes significant changes in health choices, lifestyle, and experience of the body-mind, emotion, and consciousness.

Rather than attempting to simply return me to my previous state minus a symptom, this chiropractor instead chooses to help me achieve new levels of wellness and life potential that I may never have had before.

I have read this consent form and *understand that the care in this office is different from what many consumers may expect from chiropractors practicing manipulative therapy. I agree to receive care at this office, which consists of or includes Network Care and wellness education. I understand that I am not passive in this process, but that I am an active participant in my care and in my healing.*
